

Rights & Royalties Management

F.Logic's Rights & Royalties Management is a robust, flexible and cost effective software solution for resolving your contracts, royalties and rights management challenges. It is browser-based, with features addressing Contract Management, Rights and Sub-Rights Analysis, Agreement Templates, Terms & Conditions Summaries, Agreement Events & Calendars, and Royalties and Financial Obligations. Contract Administration features give you the ability to manage the entire contract lifecycle. Rights and Sub-Rights Analysis modules provide you with detailed information required to optimize revenue. In addition, the Financial Obligation functions accommodate a multitude of schedules, foreign currencies and complex royalty transactions.

Contract Management

Rights & Royalties Management supports every phase of the contract life cycle from template creation through the completion of all requirements. It provides accuracy, from the deal memo through the signed agreement with all subsequent modifications, amendments, supplements or insertions. You can efficiently access your contracts with all supporting documentation at any time from all authorized locations. Furthermore, you can validate agreement standards, supporting documentation, schedules, status and history without the laborious process of sorting through hard copy files or scanned images.

Rights & Sub-Rights Analysis

Rights & Royalties Management resolves the labor intensive and time-consuming process of the identification of rights status and availability, including digital rights. Rights and sub-rights analysis is easily available and accessible without analysis redundancy for each business division and department. Rights information inquiries are associated with distribution, media type, formats, geographic territories and categories. A single information entry point with subsequent automatic background updating supports your goals in effective rights and sub-rights management.

Terms & Conditions Summaries

Rights & Royalties Management supports scanned long-form contract images, comprehensive summary views and user-friendly, summaries of the key terms and conditions for each agreement. This is highly flexible, so you can add or remove desired parsed terms and conditions depending on the contract. All types of agreements are supported, regardless of the complexity. In addition, each contract inquiry provides an individual navigable menu of the summarized terms and conditions, providing you with an overview of the agreement and easy access to specific areas of interest.

Agreement Events, Calendars & Reminders

The labor intensive and time-consuming tasks of continually reviewing agreement hard-copies or scanned images, and subsequently manually updating all calendars with new agreement dates and events is supported by Rights & Royalties Management. It provides contract event administration for all related agreement dates, events and obligations with calendar features including automatic calendar rollovers and reminder notices. In addition, once an event has been completed, the status and due dates of all contractual obligations contingent on that event are automatically updated.

Royalties & Financial Obligations

Rights & Royalties Management automatically analyzes the financial inter-relationships and complex royalties between agreements and their associated terms. It supports foreign currencies, provides a sub-ledger audit trail, contains an optional fully integrated accounting module, and can interface with your corporate General Ledger.
